HOME PRIDE NOTCHED TROWEL

FEATURES

Notched trowel is used to "comb" adhesives and setting materials onto various surfaces before tiles are applied on it. It is best not to attempt to apply tile adhesives or setting material to surfaces without using a notched trowel to apply it.

APPLICATION

Notched trowel is used to spread adhesive and thin set. It differs from a regular trowel in that it has notches, usually on two sides of the blade. Running a notched trowel over adhesive or leaves behind rows of the product.

DESCRIPTION

Stainless steel 304 trowel (28x12 cm) has corrosion resistance. It is used to spread tile adhesive. A notched trowel is an essential tool to apply tile adhesive.
